
Find-A-Way

A web application that helps you find
important amenities and services near you

Concept

- Increasing access of basic necessities for the homeless and vulnerable populations, as well as anyone else who needs them
- Allow for prediction of possible high demand of particular services/amenities in a neighborhood

Features

- Shows user location, and results display based on this location
- Filters for data
- Google Map API
- Simple UI for quick & easy usage

Future Direction

- A Server
 - Keep track of amenities requests, useful for predicting demands and usage
 - Automatically track and update amenities
 - Navigation feature between the current location and closest amenities
- Pop-up window for each amenity with its description and any important info (e.g. operating hours, indoors/outdoors, any special qualities i.e. women-only shelters)
- Responsiveness for mobile
- Adding more types of amenities (ex: food banks)
